KiwiTech Pvt Ltd, Delhi — Asst. Tech Lead

DEC 2010 - JULY 2023

Extracting the layout & CSS for designing sites from PSD, Zeplin, and Figma to HTML. Coding using XHTML, HTML, JavaScript & CSS. HTML5, JavaScript, JQuery & CSS3. Bootstrap, JavaScript Framework (ReactStrap, ReactUI, Teradata UI, SPA, NgxBootstrap). W3C Validation, WCAG & SEO Semantic Code.

Team Management and Role

We are working with Developers and front-end and back-end teams to capture requirements for the functional elements of projects.

Creating an environment that sustains and encourages high performance.

I convert design mockups and wireframes into pixel-perfect HTML code using my expertise. I pay careful attention to detail, ensuring that the final output matches the original design precisely. I am skilled in writing clean, organized, and well-commented code that is easy to maintain and collaborate on.

I have experience in implementing responsive design techniques, making websites adapt and look great on various devices and screen sizes. I utilise media queries and CSS frameworks to create flexible and mobile-friendly layouts that enhance the user experience across different platforms.

Accessibility is an important aspect of my work. I follow best practices to make websites accessible to users with disabilities, ensuring compliance with WCAG (Web Content Accessibility Guidelines). I strive to build inclusive experiences that cater to a diverse range of users.

Collaboration is a key part of my workflow. I am comfortable working with designers, back-end developers, and other stakeholders to ensure seamless integration of HTML
